

**Jonathan Wiesen, MD
Chief Medical Officer
Mediorbis**

Dr. Jonathan Wiesen is a Pulmonary and Critical Care physician passionate about clinical medicine, innovation and medical technology. Dr. Wiesen graduated from the Albert Einstein College of Medicine with distinction in research and completed his training in internal medicine and pulmonary/critical care at the Cleveland Clinic, where he earned an advanced teaching degree, as well as several teaching and research awards.

As a third year fellow Dr. Wiesen founded MediOrbis, a global telemedicine company which has been a leader in the provision of unique and cutting-edge clinical services and programs. MediOrbis received recognition for innovation by the American Telemedicine Association and was selected as one of the top ten telemedicine companies worldwide in 2019. As the Chief Medical Officer, Dr. Wiesen has spearheaded the development of innovative clinical programs for the monitoring and management of chronic medical conditions, and for the provision of integrated medical specialty services. Dr. Wiesen has also overseen the development of a global network of physicians to deliver outstanding telemedicine services worldwide.

In addition to telemedicine, Dr. Wiesen is actively involved in advising and assessing medical technology companies.

Dr. Wiesen remains an active physician who is passionate about clinical medicine. He has an academic appointment and is the director of the Cardio – Pulmonary Exercise Program at BG University.
